

QUEST FOR BUSINESS BROCHURE

A detailed overview of Quest for Business

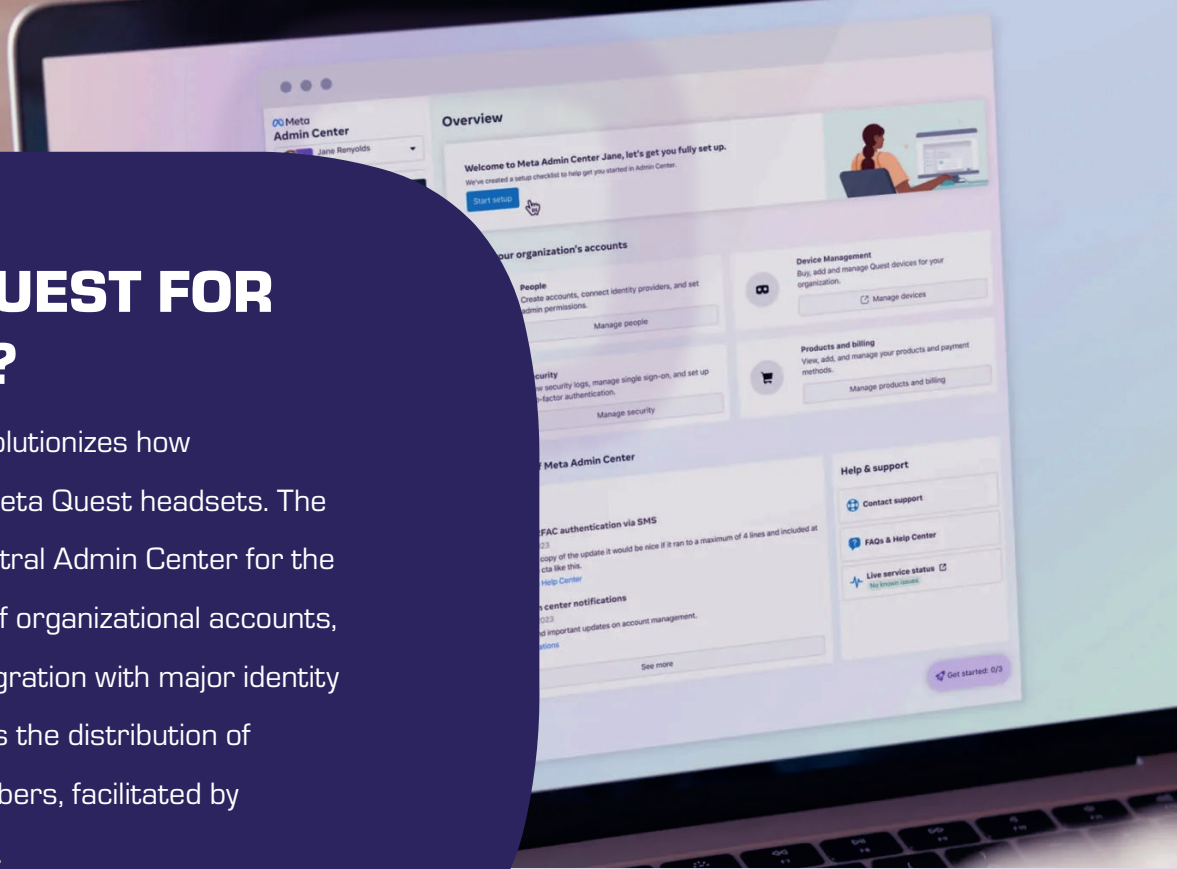

In this brochure, you will find a detailed overview of Quest for Business, with a specific focus on the relevance and target audience of this service.

We highlight how we effectively assist businesses and organizations with the implementation of Quest for Business. Additionally, we provide insight into the specialized services of Unbound, designed to fully relieve businesses and organizations in integrating XR technology, so that you can fully focus on your core activities.

WHAT IS QUEST FOR BUSINESS?

Quest for Business revolutionizes how organizations employ Meta Quest headsets. The platform provides a central Admin Center for the efficient management of organizational accounts, ensuring seamless integration with major identity providers. It streamlines the distribution of headsets to team members, facilitated by automated provisioning.

THE DEVICE MANAGER

The Device Manager delivers in-depth control across all Meta Quest headsets within your firm. With built-in MDM capabilities and optional alliances with eminent third-party MDM providers such as Ivanti, VMware Workspace ONE, and Microsoft Intune, you have the ability to configure devices en masse, tailor profiles, and closely observe device statuses. Furthermore, it provides features like certificate-based Wi-Fi support, PIN reset options, and the facility to remotely wipe devices as needed.

COMPLETE CONTROL OVER INSTALLED APPS

For a personalized work experience, Quest for Business enables administrators to effectively deploy and manage private apps on Meta Quest headsets.

This can be done via an APK link or a dedicated business channel, allowing administrators to retain control over the applications users can see and download.

NO ACCOUNTS REQUIRED

A unique feature of Quest for Business is the shared mode. This mode allows teams to share Meta Quest devices, with individual access via a simple PIN, without the need for a personal Meta account. Administrators can precisely determine which apps are available to users, creating a flexible yet controlled work environment. Thus, Quest for Business is an innovative solution that offers both security and ease of use in virtual reality, tailored to the dynamic needs of modern organizations.

PERFECT XR IMPLEMENTATION

“We are extremely satisfied with Unbound XR. Their expertise, professionalism, and proactive attitude really stand out. Simon, or rather the entire team, always goes the extra mile. Their genuine hands-on mentality makes Unbound XR the perfect partner for us.”

Albert Elzinga

Manager Digitalisation & Innovation at Bilfinger

Bilfinger - the international industrial service provider for the process industry 30,000 employees and €4.3 billion in revenue

HOW DOES UNBOUND XR ASSIST WITH THE INTEGRATION OF QUEST FOR BUSINESS?

01

THE INTAKE INTERVIEW

Unbound XR offers a comprehensive and customized path for businesses aiming to leverage the power of VR technology. The process begins with an initial consultation to discuss specific business needs and desired applications. This includes providing foundational information on the capabilities of the hardware and Quest for Business.

02

THE TECHNICAL DEEPIVE

During a follow-up appointment, we delve deeper into the business case and applications. Key topics such as data & privacy, IT infrastructure, network certificates, roles and permissions, as well as the choice of hardware and software are discussed. With our extensive knowledge of XR software, we provide solid advice tailored to your specific situation.

03

THE CUSTOM PROPOSAL

Based on the gathered information, we draft a detailed proposal that includes the selected hardware, software, and any additional services. This proposal is discussed and refined to perfectly align with your needs.

04

TURNKEY DELIVERY WITH TRAINING

Once the selection is made, the hardware is delivered turnkey, and we are available to provide the necessary training and workshops. This ensures that everyone in your organization, including key stakeholders, has the knowledge to independently use Quest for Business. We can also take on the project management for the entire implementation.

05

5X8 HELPDESK

Once operational, Unbound XR offers a 5x8 helpdesk for all queries regarding the hardware and software. This is an optional service that can offer considerable support to your organization. Furthermore, we can take over the complete management of the Quest for Business environment, relieving your IT department. Stay informed of all possibilities and developments.

Finally, our account manager maintains close contact with you, ensuring you are timely informed about new developments and opportunities relevant to your business. With Unbound XR, you opt for seamless integration of VR technology into your business processes.

Convinced by our approach or have additional questions? Contact our customer service and ask for our Quest for Business Consultants for a free introduction call.

WHAT WE ALSO OFFER

Unbound XR offers a complete package of services and products for organizations that want to push the boundaries of technology with Extended Reality.

TRAINING

We offer specialized MDM training essential for effective use of Quest for Business. These training sessions cover device addition, software, network configuration, and setting up roles and permissions. This training is also available separately.

LOAN EQUIPMENT, TEST SAMPLES, AND RENTALS

Discover the versatility of our hardware by renting loan equipment temporarily or testing samples. We support you in finding the right solutions. We also have the right solutions for organizing events.

TURNKEY DELIVERY

We ensure seamless integration of technology into your business, with services ranging from installing and configuring MDM to your specifications to providing essential accessories for hygiene and comfort. Additionally, we offer custom solutions such as branding and registration labels on hardware and provide storage systems complete with UV cleaning and charging facilities.

FINANCING AND SUSTAINABILITY

In collaboration with XR Refresh, we offer attractive leasing options for purchases above 10,000 euros. This is not only beneficial for the environment but also for your budget. We buy back the hardware when replaced and ensure secure data removal. Furthermore, we provide comprehensive warranties and additional insurance against impact, shock, or moisture damage.

CONSULTANCY AND PROJECT MANAGEMENT

From one-time workshops to long-term projects, we guide clients in the successful implementation of XR in their organization. This includes everything from concept to deployment by our experienced XR project managers, focusing on custom solutions, efficiency improvement, and innovative technologies.

MANAGEMENT OF YOUR QUEST FOR BUSINESS HARDWARE FLEET

Our helpdesk provides expert first-line support for all hardware and software inquiries. We also closely manage hardware versions and updates, Mobile Device Management (MDM) systems, and your applications on the devices, ensuring optimal performance and security.

HARDWARE SALES

As an official Meta reseller, we offer a comprehensive range of Meta XR Hardware, including Meta Quest Pro, Quest 2, and Quest 3. Additionally, we have specialized accessories focused on comfort, hygiene, and expanding hardware capabilities, both original and third-party.

INTEGRATED SOLUTIONS

Designing VR spaces, custom flight cases, experience with custom hardware systems. Unbound XR is your partner for a complete XR experience tailored to your organization. For information and implementation of Quest for Business, contact our consultants.

FORGET BOOKS AND WHITEBOARDS: CURIO SHOWS THAT CONVEYING KNOWLEDGE CAN GO MUCH FURTHER THAN TRADITIONAL TEACHING AIDS.

For Curio, Unbound XR stood out as a supplier because of their comprehensive range of hardware, but especially due to their expertise in software and XR implementation in larger organizations. That's why the vocational education provider decided to collaborate with Unbound XR. "We received a lot of assistance from Unbound XR. In addition to providing information and helping us choose the right hardware, Unbound XR supported us in shaping our project plan. Unbound XR also conducted an inspirational session for a group of our teachers, leaders, and associates."
